Description of Structure(s) Covered			

TERMS

1. The Company agrees to provide bee / wasps services at the service address indicated above.
2. The Property Owner identified below authorizes Central Termite and Pest Control to remove ____ colony/colonies of honey bees from the property identified below.
3. Central Termite and Pest Control will make the best effort to remove all combs to ensure no honey or brood remains to attract pests or cause damage. Central Termite and Pest Control will make the best effort to remove as many honeybees from the property as possible. 100% removal of all honeybees belonging to this particular colony may not be possible because a portion of the colony will be out collecting nectar and pollen. When these bees eventually return to the hive location to find their colony missing, they usually disperse within 24-48 hours. In order to attract these residual bees away from the cavity formerly occupied by the bees and to clean out any residual honey remaining the cavity.
4. Central Termite and Pest Control relieves the Property Owner of any liability should an accident occur causing injury to the Central Termite and Pest Control technician or damage to his equipment while performing bee removal services provided such injury is not the result of the Property Owner's negligence or deliberate act.
5. Central Termite and Pest Control may either disassemble the structure containing the honey bee colony or will cooperate with the Property Owner's repairman as necessary to remove the bee colony. Central Termite and Pest Control will make the best effort to minimize damage to the structure.
6. The Property Owner understands that bee colony removal may require disassembly of, or damage to, parts of walls, floors, ceilings, roof, interior, exterior, tree, or other parts of the honey-bee-inhabited cavity in order to remove the honey bees and honey comb from the cavity.
7. The Property Owner understands that Central Termite and Pest Control will not perform repairs nor be held responsible for any repair work required resulting from the honey bee colony removal effort or from accidental damage. The Property Owner understands that all repairs are his or her responsibility.
8. The Property Owner understands that his or her repairman performing the repairs must promptly seal up the cavity and cavity entrance properly to ensure that no other colony of honeybees will find and inhabit the same location in the future. It is the Property Owner's sole responsibility to communicate this information to the contractor.
9. The Property Owner understands he or she is urged to obtain an estimate of repair costs prior to the commencement of bee removal. Central Termite and Pest Control will consult with the repairman at no charge to ensure the repairman knows what Central Termite and Pest Control expect to do.
10. The Property Owner understands that the bee removal process may require multiple visits to complete. Central Termite and Pest Control will make the best effort to complete the removal expeditiously.
11. The Property Owner understands that the bee colony, comb, and honey become the property of Central Termite and Pest Control once the removal process begins.
12. The Property Owner relieves Central Termite and Pest Control of any liability should any person on or near the property receives a bee sting during or after the bee removal process and will take necessary steps to restrict access to the removal site.
13. The Property Owner will not apply any pesticides or other harmful substances on or near the bee colony or on any blooming plants on the property until after Central Termite and Pest Control reports that the removal work is complete.
14. The Property Owner has applied the following pesticides on the following approximate dates:
